JAYANT JOSHI

UI/UX Designer

PROFILE

As a skilled UI/UX and frontend developer, I've transformed user experiences and interfaces at iRoots-org and Meshery. With expertise in Bootstrap and React JS, I've resolved critical bugs and implemented responsive designs. My biggest achievements include enhancing platform performance and creating seamless user interactions, showcasing my dedication to quality and innovation. And I am 5 star coder @Hackerrank

EDUCATION

B.Tech. @ B R Ambedkar National Institute of Technology, Jalandhar.
Aug 2023 - Present
I am currently pursuing a degree in Chemical Engineering at Dr. B.R. Ambedkar National Institute of Technology. Despite my major, I have a profound interest in the technical aspects of web development, particularly frontend engineering and UI/UX design. My passion for creating visually appealing and user-friendly interfaces drives my contributions to various projects, where I apply my skills to enhance user experience and interface functionality.

WORK EXPERIENCE

UI/UX Intern @iRoots-Org,Remote
Jun2024-July2024
As an intern to iRoots-org, I played a crucial role in designing the wireframes and UI for the review module, ensuring a user-friendly and visually appealing interface. I collaborated closely with the frontend team, providing valuable insights and support to implement the designs effectively.

Open Source Contributor @Meshery,Remote
Jun2024-Present
As a contributor to Meshery, I focused on enhancing both UI/UX and frontend development. I designed and integrated new icons, significantly improving the platform's visual appeal and user experience. Additionally, I tackled various frontend tasks, optimizing code and implementing design improvements to ensure a responsive and intuitive interface.
